

GREEN-SCREEN

SUNSCREEN FOR SPORTS TURF

**A NATURAL LONG LASTING
PIGMENT GREEN DYE**

Agronomic's GREEN-SCREEN is a highly concentrated state of the art pigment and green dye technology.

This pure liquid provides all the necessary antioxidants and flavonoids to protect the grass from harmful UV radiation light and disease pressure during stressful periods of the year.

Produces a strong green sward which increases plant energy and canopy temperature, therefore improving photosynthesis during winter and the early spring months.

Provides a natural long lasting green dye and can be applied with Agronomic's & Floratine foliar nutrition.

Application rate of 1-1.5lts/ha in 250-450lts of water.
Apply any time of the year.

AGRONOMIC'S

Liquid Sunshine

- ✓ **Enhances growth in low light/shaded conditions**
- ✓ **Supports plant photosynthesis**
- ✓ **Regulates nitrogen conversion**
- ✓ **Enhances plant respiration**
- ✓ **Increases cell strength and plant energy reserves**
