# PERVADE

## PREMIER INFILTRATION TECHNOLOGY

*Pervade* is a superior soil penetrant designed to assist managers in the effective management of moisture including:

- Infiltration
- Dispersion
- Uniform Distribution
- Hydrophobic Soils
- Hot Spots
- Dew
- Flushing
- Perching

*Pervade's* proprietary formulation promotes quicker, longer lasting moisture penetration properties to soil than traditional alcohol and soap base wetting agents.

*Pervade* is non-burning and is compatible with treated water supplies. Unlike alcohol and phenol wetting agents, *Pervade's* constituents are 100% biodegradable.

## PROFESSIONAL USE GUIDELINES

1

### ACTIVE INGREDIENTS

Proprietary Blend of Di-Sulfosuccinate & Methyl  
4-Pentanediol Surfactants. . . . . 72,0%

Buffers, Couplers, and Stabilizers  
Ineffective as Spray Adjuvant . . . . . 28,0%

Net Weight: 1,00 kg/L

Rate of Application:

**General:** Use in any area where even distribution of water through the soil structure is the desired objective. *Pervade* has a very low toxicity index to plants. However, to achieve maximum effectiveness, the product should have the benefit of adequate water to reach the soil surface.

**Finte Turf Areas:** Apply 5-20 litres per hectare with initial application. Make maintenance applications every 3-4 weeks as needed to assist infiltration and percolation.
