

**AGRONOMIC'S**

LIQUID SPORTS TURF RANGE

# AGRONOMIC'S

The Agronomic's LIQUID SPORTS TURF RANGE is manufactured to the highest standards, using the purest raw materials. This ensures rapid nutrient up-take in an efficient, cost effective manner.

## AGRONOMIC'S SPORTS TURF MIX 20-0-0+Fulvic+6%Fe+Kelp

A combination of nitrogen forms with organic acid for speedy uptake and absorption. Complexed iron produces long lasting colour and kelp for root development.

Application rate: 20-40lts/ha in 300-400 lts of water.

## AGRONOMIC'S SUPER K 3-0-25

Is a specially formulated low nitrate and high potassium feed, suitable for all year round application.

Application rate: 10-20lts/ha in 300-400 lts of water.

## AGRONOMIC'S SUPER K 11-0-40

Is an 11% nitrate based application with 40% potassium. This produces strong stress free growth.

Application rate: 10-20lts/ha in 300-400 lts of water.

## AGRONOMIC'S MULTI-MICRO Mg+Fe+Zn+Mn+B+Cu+Su+Mo

Provides turf with a wide spectrum of high quality micronutrients to keep the sward healthy and reduce the risk of deficiency during times of stress and low root-zone availability.

Application rate: 5-10lts/ha in 300-400 lts of water.

## AGRONOMIC'S SUPER-MAG

Is a quality foliar treatment, which supports the photosynthetic process, producing strong healthy turf.

Application rate: 10-20lts/ha in 300-400 lts of water.

## AGRONOMIC'S SUPER-MAN

Is a quality foliar treatment containing Manganese, Magnesium and Nitrogen. Super-Man corrects deficiencies and reduces disease pressure.

Application rate: 10-20lts/ha in 300-400 lts of water.

# TURF STRENGTHENERS

## **AGRONOMIC'S** CAL-PLUS HARDENER

Is designed to increase plant cell wall strength, supporting the plant's ability to withstand stress, the balanced ratio of nitrate, calcium and magnesium plus Mn, Fe, B, Cu, Mo, produces a hardier, more disease resistant turf. Especially beneficial in sports stadiums.

Application rate: 5-10lts/ha in 300-400lts of water.

Nitrogen 15.0%  
Iron 750mg/l

Calcium 22.5%  
Boron 750mg/l

Magnesium 3.0%  
Copper 600mg/l

Manganese 1500mg/l  
Molybdenum 15mg/l

## **AGRONOMIC'S** DEFENDER PLUS

This unique disease defence product can be used as part of a feed plan or applied with fungicides. This formulation of Defender Plus contains a high percentage of phosphate and phosphite. It has the additional benefit of the defence metals, manganese and zinc for disease resistance.

Application rate: 5-10lts/ha in 300-400lts of water.

Phosphate ( $P_2O_5$ ) 22.0%

Potassium ( $K_2O$ ) 25.05%

Manganese 250mg/l

Zinc 1350mg/l

## **AGRONOMIC'S** TOTAL-18 BIOSTIM

Is a highly concentrated NPK solution containing a unique package of all macro, secondary and micro nutrients. Root-zones often struggle to provide the necessary nutrition for the turf from September to May, when the turfs ability to utilise the most important elements are limited. The combination of food in the product ensures enhanced rooting, winter colour and strength all year round.

Application rate: 10-15lts/ha in 300-400lts of water.

Biostimulant 28%  
Magnesium 1.5%  
Zinc 730mg/l

Nitrogen 18.0%  
Iron 1460mg/l  
Boron 290mg/l

Phosphate 18.0%  
Manganese 730mg/l  
Cobalt 12mg/l

Potassium 18.0%  
Copper 730mg/l  
Molybdenum 12mg/l

## **AGRONOMIC'S** IRON MAN+Fe+Seaweed 5-0-0+7%Fe

This product combines a powerful biostimulant with iron and nitrogen. It is used to enhance turf colour and hardness, while increasing root development. The combined formulation of biostimulant plus iron and nitrogen, creates a healthy sward, which can be less susceptible to Fusarium. The product is also used on sports fields to increase sward colour and appearance.

Application rate: 20-40lts/ha in 300-400lts of water.

## **AGRONOMIC'S** SUPER KELP

This concentrate ensures maximum retention of auxins and cytokinins. Super Kelp also contains nutrients, vitamins and amino acids. Rich in auxins, it produces exceptional root growth following application, improving the uptake of nutrients and resisting stress, especially caused by root diseases. Works well combined with Oxy-Rush and Osiryl.

Application rate: 5-10lts/ha in 300-400lts of water.

## LIQUID SPORTS TURF RANGE NUTRIENT LEVELS

PRODUCT	Major Nutrients % w/v									Micronutrients mg/L (unless stated as %)							
	N				P2Os	K2O	MgO	SO3	CaO	B	Cu	Fe	Mn	Mo	Zn	SG
