RENAISSANCE

MICRONUTRIENT TECHNOLOGY

Renaissance is a premium quality micronutrient compound containing **Floratine Technology** designed to supplement other sound nutritional practices to promote health and quality in managed turfgrasses.

Renaissance provides a balanced formulation of secondary and micronutrients and naturally occurring plant extracts designed to ensure rapid and linear availability of critical elements to all turfgrasses.

- **Enhanced Health and Beauty**
- **Improved Stress Tolerance**
- **Deficiency Protection and Correction**
- **Foliar Uptake Economy and Efficiency**

PROFESSIONAL USE GUIDELINES

5

NUTRIENT CONTENT

| | |
|--|------|
| Iron (Fe) water-soluble | 2,0% |
| Manganese (Mn) water-soluble | 1,0% |
| Zinc (Zn) water-soluble. | 2,0% |

Net Weight: 1,245 kg/L

Rate of Application: Renaissance can be applied as a corrective measure for some micronutrient deficiencies or, more ideally, in a maintenance spray program to preclude the development of deficiency signs and symptoms. Apply to turf at the rate of 5 to 10 litres per hectare and repeat bi-weekly throughout the active growing season to preclude the development of deficiencies. For specific deficiency problems or questions, please contact your Floratine Distributor.
