

HUMWET® G

GRANULAR WETTING AGENT

- ✓ **HumWet® G** is a humic and fulvic acid infused granular soil surfactant, created for use by sports turf professionals to treat dry patch.
- ✓ **HumWet® G** increases water retention and nutrient availability in hydrophobic soils.
- ✓ **HumWet® G** increases hydration, reduces plant wilt and stress, promotes faster and more complete root development and turf vigor.
- ✓ **HumWet® G** is a combination product, which performs for up to 6 months.
- ✓ **HumWet® G** can be blended with fertiliser or top dressing and is applied directly to the root-zone via broadcast equipment, to add hydrophilic properties, therefore conserving water.
