WINTER SPORTS TURF

AGRONOMIC'S CAL-PLUS HARDENER

Is designed to increase plant cell wall strength, supporting the plant's ability to withstand stress. The balanced ratio of nitrate, calcium and magnesium plus Mn, Fe, B, Cu, Mo, produces a hardier, more disease resistant turf. Especially beneficial in sports stadiums.

Application rate: 5-10lts/ha in 300-400lts of water.

AGRONOMIC'S Total 18-18-18+Micros

Is a highly concentrated NPK solution containing a unique package of all macro, secondary and micro nutrients. Root-zones often struggle to provide the necessary nutrition for the turf from September to May, when the turfs ability to utilise the most important elements are limited. The combination of food in the product ensures enhanced rooting, winter colour and strength all year round.

Application rate: 10-15lts/ha in 300-400lts of water.

AGRONOMIC'S IRON MAN+Fe+Kelp 5-0-0+7%Fe

This product combines a powerful biostimulant with iron and nitrogen. It is used to enhance turf colour and hardness, while increasing root development. The combined formulation of biostimulant plus iron and nitrogen, creates a healthy sward, which can be less susceptible to Fusarium. The product is also used on sports fields to increase sward colour and appearance.

Application rate: 20-40lts/ha in 300-400lts of water.

DISEASE PREVENTION

FLORATINE FLORADOX PRO

Specifically designed to increase the plant's immune system and enhance resistance to disease by providing phyto-chemicals. In addition, Floradox Pro supplies supplemental building blocks and energy sources to generate defensive and recuperative proteins. These protein compounds are the key to a plant's ability to withstand stress, heal wounds and recover from injury. Floradox Pro is designed to enhance cellular and tissue strength.

FLORATINE PROTESYN

ProteSyn is Protein Synthesis! This advanced liquid organic complex provides complete amino acids, proteins, simple and complex carbohydrates and essential turf vitamins to conserve plant energy and improve photosynthetic efficiency.

AGRONOMIC'S DEFENDER PLUS

Is a unique disease protection product with a high percentage of phosphate and phosphite and defence metals for complete plant energy and protection.
