HUMIC ACID CARBON FOOD FOR LIFE IN THE SOIL

Humic Acid is known to be among the most bio-chemically active materials found in soil. Humic Acid is especially beneficial in freeing up nutrients in the soil so that they are made available to the plant as required. By using either Maxiplex (liquid) or EON BIO -75 (granular) you will see, increased root vitality, improved nutrient uptake, increased chlorophyll synthesis and better seed germination. Maxiplex and EON BIO -75 are superb carbon food sources for beneficial microbes. Maxiplex works in harmony with both Oxy-Rush and Osiryl. Agronomic Services now supplies two of the highest grades of liquid and granular Humic Acids.

MAXIPLEX

(application rate 10-20lts/ha)

Is pure turfgrass energy for respiration and stress relief, specifically designed to revitalize intensively managed turf.

EON BIO - 75

(application rate 50-100kg/ha)

EON BIO - 75 is a long term soil conditioner, it is 100% organic and contains the highest concentrations of soluble Humic Acids available. The Humic Acid contained in EON BIO -75 are the most biologically active and plant stimulatory known.

Apply with top-dressing after aeration.

EON BIO -75 contains a full range of beneficial bacteria and mycorrhizal fungi.
