

## **SPRING START & DISEASE RECOVERY**

### **RAPIDLY RESTORING PUTTING SURFACES**

The cold wet start to the year greatly reduces plant growth. The various grasses grow at different rates, so surfaces are very slow to get back to their former glory. The rootzones are too cold for granular applications and microbial activity is slow. Agronomic Services has developed a Foliar Recovery Spray Plan, to repair disease scars and aeration holes. All grasses will grow at the same rate.

#### **PER 4 MAX**

**(application rate 5lts/ha)**

A specifically designed biostimulant to increase density and rooting on weak turf and support chlorophyll production.

#### **CARBON N**

**(application rate 5lts/ha)**

Three forms of nitrogen with proprietary technology to translocation nutrients, which is specifically formulated for foliar uptake.

#### **PROTESYN**

**(application rate 5lts/ha)**

Provides complete amino acids, proteins, carbohydrates, antioxidants, improving the plant's energy and photosynthetic process.

#### **LARGO**

**(application rate 5lts/ha)**

New improved Iron formulation with micronutrients for immediate green up, encouraging healthy plant and root development.

#### **RAIDER PLUS**

**(application rate 1.5lts/ha)**

Raider Plus is a unique spray adjuvant specifically designed to improve the up-take and absorption of any systemic/foliar applied liquid.

**All products are tank mixable in 150-300lts/ha sprayed onto the leaf.**
